SUBSCRIPTION PLANS

A plan for every family.

Accessible care. Healthier communities.

SILVER

PHP 1,800 / year

PHP 150 / month equivalent

Household share: PHP 75 / month*

GOLD

PHP 3,000 / year

PHP 250 / month equivalent

Household share: PHP 125 / month*

PLATINUM

PHP 4,200 / year

PHP 350 / month equivalent

Household share: PHP 175 / month*

Across all plans

Care Assistant · TeleHealth services
MediBox · Discounts on vitamins and medical supplies

*Proposed 50% LGU subsidy. Household shares depend on LGU participation. Individual services may carry separate charges.

AdvanCare

THE PROPOSED CARE ECOSYSTEM

One closed care loop.

Community-driven. Technology-enabled. People-centered.

01 **Local care**

RHU and barangay teams connect residents to care.

02 **Reliable transport**

Scheduled, non-emergency rides connect home and health facilities.

03 **MediBox & TeleHealth**

Out-of-hospital assessment and remote consultation support continuity.

AI-ENABLED HEALTHCARE MANAGEMENT

Care closer to every community.

Connecting families to accessible, affordable, coordinated care in Cagayan.

From lived experience to connected care.

FOR FAMILIES. WITH COMMUNITIES.

01 / OUR LIVED PATIENT EXPERIENCE

A journey we witnessed.

An aging farmer's route to care can mean more than one difficult trip.

Patient → Tricycle / kuliglig → RHU → Medicines

Distance, travel costs, waiting, and another stop for medicines can turn a routine visit into a demanding journey.

> *"Access, affordability, and follow-up must work together."*

Source-slide illustrations show a typical rural persona; they are not photographs of an identified patient.

02 / THE PROBLEM

Care exists. Access still falls short.

In Cagayan, care can be hard to access, afford, and coordinate.

01 Trusted care is hard to find.

Families struggle to find and match screened caregivers.

02 Care is costly and far away.

Transport and out-of-hospital expenses strain rural households.

03 Support is fragmented.

Bookings, records, updates, and payments are scattered. Follow-up can break after discharge.

57 years
Median age of Filipino farmers

31%
Farmers in poverty in 2018

56% of Cagayan deaths in 2020 had no medical attendant.

Historical figures from the presentation.
Sources cited there: PSA (2020; 2018), and DA via PCO (farmer median age).

03 / THE PROPOSED SOLUTION

Connect. Coordinate. Continue care.

An integrated, community-based ecosystem linking people, services, and communities across Cagayan.

1 Connect in local language

Link residents to trusted local healthcare and caregiving support.

2 Match & track

Match needs with caregivers or health professionals. Keep appointments, records, and payments connected.

3 Follow up

Use reminders, updates, and post-visit coordination to support continuity.

4 Improve community care

Use health trends to help anticipate community needs and strengthen local services.

One coordinated journey. Care that continues.
