AI-ENABLED HEALTHCARE MANAGEMENT

Care closer to every community.

No Barangay Resident left behind in Healthcare.

From lived experience to connected care.

FOR FAMILIES. WITH COMMUNITIES.

01 / OUR LIVED PATIENT EXPERIENCE

A journey we witnessed.

An aging farmer's route to care can mean more than one difficult trip.

Patient → Tricycle / kuliglig → Rural Health Unit → Medicines

Distance, travel costs, waiting, and another stop for medicines can turn a routine visit into a demanding journey.

"Access, affordability, and follow-up must work together."

Source-slide illustrations show a typical rural persona; they are not photographs of an identified patient.

02 / THE PROBLEM

Care exists. Access still falls short.

In most rural barangays and urban poor districts, care can be hard to access, afford, and coordinate.

01 **Trusted care is hard to find.**
Families struggle to find and match screened caregivers.

02 **Care is costly and far away.**
Transport and out-of-hospital expenses strain rural households.

03 **Support is fragmented.**
Bookings, records, updates, and payments are scattered. Follow-up can break after discharge.

57 years
Median age of Filipino farmers

31%
Farmers in poverty in 2018

56% of Cagayan deaths in 2020 had no medical attendant.

03 / THE PROPOSED SOLUTION

What you get.

A Care Assistant
A caregiver for your home or hospital stay, hired by the shift, matched to the patient's needs by Artificial Intelligence (AI).

- **₱300** per 8 hrs: home-based caregiver — Barangay level care
- **₱500** per 8 hrs: Nationally-Certified Caregiver — Hospital-endorsed

B TeleHealth
See and talk to a health worker on a video or phone call. Get advice without traveling.

C MediBox
A small health-check kit for your home, barangay, or disaster area. It sends your results to your health worker.

D Non-Emergency Medical Transport (NEMT)
Booked rides to and from the health facility. We match you with the nearest ride, powered by AI on the least-cost route to minimize fuel.

E Discounted Medical Supplies
Vitamins & supplies not covered by PhilHealth YAKAP. Prepositioned supplies based on local epidemic data.

F Donor Network
Individuals and private donors who fund subscriptions and supplies for families in need.

TeleHealth, MediBox, and discounts come with every plan. Care Assistant is paid per 8-hour shift. Individual services may carry separate charges.
